A  B  C  D

Question 25: I’m looking forward to hear some good news from you soon.
A  B  C  D

Read the passage below and circle one correct answer (A, B, C or D) for each question.

Air pollution occurs when wastes dirty the air. People reduce most of the wastes that cause air pollution. Such wastes can be in the form of gases or particles of solid or liquid matter. These substances result chiefly from burning fuel to power motor vehicles and to heat buildings. Industrial processes and the burning of garbage also contribute to air pollution. Besides, there are other polluting substances that exist naturally in the air. They include dust, pollen, soil particles, and naturally occurring gases.

The rapid growth of population and industry and the increasing use of automobiles and airplanes have made air pollution a serious problem. The air we breathe has become so filled with pollutants that it can cause health problems. It also harms plants, animals, building materials and fabrics.

Question 26: When does air pollution happen?
A. when wastes are in the form of gases  B. when people produce wastes
C. when people reduce wastes  D. when wastes dirty the air

Question 27: What does NOT contribute to air pollution?
A. Industrial processes  B. The burning of garbage
C. The natural existence of oxygen in the air  D. Motor vehicles

Question 28: What are natural pollutants?
A. garbage  B. pollen  C. vehicles  D. industrial processes

Question 29: What hasn’t made air pollution a serious problem?
A. the growth of intelligence  B. the increasing use of automobiles
C. the rapid growth of industry  D. the rapid growth of population
